

COACHING MANUAL

1) Yoga as a sport

There is still so much controversy surrounding the concept of Yoga as a Sport.

Knowing that Yoga is one of the six philosophical systems of India, Yoga Sports focuses on the Asanas. The Asanas are one of the eight limbs of Yoga, where we can meet outside and verify our inner work.

If you look closely, yoga and sport both aim to maintain and improve our physical skills. They both transform our physical state, entertain us. Both Yoga and traditional Sports entertain those watching, and both bring joy to the mind.

Therefore, as Sports are governed by rules and regulations in order to ensure fair play and just competition, Yoga is also governed by ethical principles of honesty and integrity. The goal is the same.

In Sports, the term sportsmanship expresses aspiration, that the activity will be enjoyed for its own sake. In Yoga the term “santosha” expresses the same: it refers to a joy which is independent of external sources.

In other words, if you play a Sport or perform a Yoga posture on stage and you feel joy of doing it, you are a champion. This is the message that we want to get through - Healthy competition and unity through Sport to the new generation. Please, help us spread the IYSF message, help us introduce this new branch of Yoga as a Sport discipline.

2) Basic principles

Yoga Sport, founded on the millennia-held values of traditional Indian Yoga, in competitions turns its total attention to asanas/postures. IYSF judges score the asanas based on difficulty, minimum expression, traditional recommended execution and characteristics of the athletic aspects of strength, flexibility and balance. Postures are divided into six groups of skills performed by the athlete during the competition:

1. Back Bend
2. Forward Compression
3. Traction
4. Torsion
5. Lifts
6. Inversions

While honoring the main principles of Yoga, the athlete must hold each posture for 3 - 5 seconds and must complete the six-posture routine within three minutes.

In all IYSF National, Continental and International championships scores given by IYSF official judges are displayed immediately via IYSF tabulation grids, assessing percentages of difficulty and execution. Time Judges deduct points for not holding postures long enough. IYSF grids are fully in accordance with IYSF rules and regulations and all rights of usage are fully reserved to IYSF.

Only National federations can certify their B - level National Judges and Coaches acting on national level and International Yoga Sport federation certifying A - level International - acting on international level.

Only IYSF National and Continental Championships can qualify athletes for the World Championship.

3) Organization and Goals

The only way for yoga sports to get world-wide recognition is to develop yoga sports discipline under IYSF as a world-governing body and unifying all National Federations and their competitions.

Classically in sport, all competitions are divided into several levels, depending on their statutory importance according to their world governing bodies.

IYSF has two-level competition criteria:

1. National Championships: only those can qualify athletes for the Continental cups and World (Global) Cup. Continental cups can act as a substitute in cases where a country doesn't have the National Federation.
2. International Competitions (invitational cups): these can also include different disciplines of yoga sports competitions (synchronous, team performances etc.). Athletes can participate in

such international competitions regardless of the results of national championships and are delegated in accordance within the competencies of each National Federation.

All National, International, Continental and Global (World) Yoga Sport competitions are organized by IYSF National federations or appointed IYSF Continental Councils (according to IYSF statutes) and must be registered on the [IYSF calendar](#).

Only competitions registered in this manner will be considered IYSF events.

IYSF aims to encourage yoga athletes to participate in as many competitions as possible as well as organizing yoga sports competitions using the IYSF rules, scoring system, and other IYSF materials restricted to IYSF- recognized official federations and appointed continental councils.

IYSF is currently working on meeting the criteria for inclusion in GAISF (Global Association of International Sports Federation, [gaisf.sport](#)) which is the first step to becoming an Olympic Sport. This requires meeting several criteria, including unifying 40 active federations spread on 5 continents, regular national and international competitions, and developing rules and regulations and IYSF own educational program for coaches, judges and athletes.

IYSF will unite and assist its official members and oversee all IYSF yoga sport competitions worldwide, fully adhering to the principles of World Anti-Doping Convention and Fair Play as any other sport governing body on its way towards the inclusion as an Olympic sport.

4) The goal of International Yoga Sport Academy

The Educational program of IYSF is designed to train teachers and yoga sport coaches to teach :

- Yoga Sport Class (90 min or 60 min- intermediate class)
- Yoga Skill classes (on Spine, Hips, Lifts, Inversions) each consisting of standardized opening exercises on specific themes including the different difficulty variations and assistances and Skill Drills for all postures from the rulebook.
- All the coaches/teachers will receive a manual for teaching 49 yoga skill classes, which should help elevate Yoga Sport (as a complementary discipline) to gymnastic, figure skating, and different children's sport clubs and help us bring more sports kids on national, continental and international yoga sport stage.

How we will implement the program:

After the first IYSA coach/teacher training, we (IYSF and National Federations) will offer the different sport clubs Yoga Sport Weekends (as a Teaser) led by IYSF A-level coaches, giving them opportunity to open a new complementary yoga sport compensation discipline in their clubs, where IYSF or our National Federations would send A-level coaches to teach the standardized Sport Classes and Skill Classes. Later They can get their own Teachers trained. Different Yoga studios in town can also get their Teacher trained and sell Yoga Sport and Skill classes (become "ambassador of yoga sport") or open a yoga sport club. A - level Coaches can open their IYSF affiliated yoga sport academy within their schools.

5) Yoga Sports Class

[Link to 90' Yoga Sports class dialog recording](#)

Yoga Sport Classes are either a 55-posture (90-minute Sport Class) or 41-posture (60-minute Sport Class) dynamic yoga class practiced with or without heat. This class is an ideal warm up class for the championships and is suitable for all levels. It covers all aspects of the spine: forward bends, backward bends, tractions and twists and includes a couple of lifts and one inversion: shoulder stand. All yoga studios should offer Yoga Sport Classes daily.

6) Yoga Sports Class 90 & 60 Dialogue

[Link to the yoga sports class dialog \(PDF\)](#)

7) Yoga Skill Class

There are four types of body conditioning classes. Every day focusing on a different specific skill.

Each day 1-3 postures of the same Skill Group and the same Mobility Theme should be addressed.

Ex.:

- Yoga Sport Skill – Spine (Monday)
- Yoga Sport Skill – Hips (Tuesday)
- Yoga Sport Skill – Lifts (Wednesday)
- Yoga Sport Skill – Inversions (Thursday)
- Coaching of Routines for the Competition - Friday

Every week the schedule should shift by one day, so that the youth attending once a week (always the same day) can train all the skills. Friday Skill Class should be reserved for Competition Routine Coaching.

Those Skill classes should be added on the schedules of the studios in the afternoon hours when kids are off school, spread globally, various studios becoming Ambassadors of Yoga Sport. Teachers are trained by IYSF or National Federation A level Coaches (IYSF certified).

8) Postures Skill Groups, Mobility Themes and Skill Classes

All rulebook postures are divided for the consistent coaching aspect and understanding into the **Skill Groups** of **Spine, Hips, Lifts and Inversions**. Those are divided according to the specific posture **Mobility Themes** into the separate 60 min **Skill Classes** described below.

Each Skill Class consists of 1- 3 postures.

Each Skill Class starts by a **WARM UP** in the center or by the **MOVEMENT IN THE LINES** for each posture, **POSTURE PRACTICE** in the center (according to the PG recommended execution including all levels variations specific to the postures as proposed in our Opening Exercises and Drills videos), short **RECUPERATIVE EXERCISE** (from anatomy session or recuperative Drills) and 2 min **SAVASANA** at the end.

It's up to the coach/ teacher to organise each class according to the students level, needs and requirements and follow the progression of the exercises in the correct difficulty order as mentioned in the Coaching Manual.

Skill Classes should be provided by the yoga studios and Sport clubs every day in the afternoons in order to get large kids participation on a hobby level but also as a preparation for a Yoga Sport Stage.
